## **Paraclete Aviation Life Support Announces Corporate Expansion**

July 8, 2022 — Paraclete Aviation Life Support continues its upward momentum with the announcement of the company's new office location, increasing its square footage by 84% to accommodate the helmet manufacturer's increasing demand for its DOI-USFS certified helmet product line of its research-based Aegis and Aspida helmets as the company increases its presence into diverse segments of civilian and military markets --- air ambulance/HEMS, agriculture, law enforcement, wildland firefighting, and federal and state agencies --- as well as expanding its distributor connections throughout the world, with the company's recent decision to secure a distributor in Germany, Commercial Helicopter Services [CHS].

Paraclete further strengthens its global presence in the rotor- and fixed-wing helmet market, extending the company's international footprint with the recent expansions into South Korea, Brazil and Australia, as well as its continued relationships in Europe, South America and Asia. Emerging as a global provider of civilian aviation helmets, Paraclete continues to build strategic partnerships in 30 countries throughout the world in commercial and military markets since its launch in 2014.

"Our entire mission is designing aviation helmets with innovation, technology, and modern composites for the purpose of protection and comfort," said Paraclete President and Founder, Scott Hedges. "The decision of which rotor helmet to wear is based on comfort, innovation and safety, the three pillars that drive Paraclete's product designs, culminating in the company's Aegis and Aspida helmets."

"In response to the increased demand, the additional square footage will strengthen our workflow production and efficiency and represents an opportunity to extend our corporate structure to enhance the workplace environment for employees who now enjoy a few 'comfort' features," said Hedges.

The new address for Paraclete Aviation Life Support is: 1760 Jardco Drive, Clarksville, TN 37040, located in an industrial park complex, north of Nashville. Paraclete is located in one of the fastest growing cities in the state of Tennessee which reflects the marked business growth, including Paraclete's expanding operations.

### **DOI-USFS CERTIFIED HELMETS**

Paraclete Aviation Life Support secured certifications for all three [3] of its product line of helicopter helmet models: the Aegis [ee-jis] D Type 1, the Aspida [a-speed-a] D Type 1, and the Aspida-Carbon-D, as set forth by the Department of Interior [DOI] and the United States Forestry Services [USFS] Aviation Helmets Standard.

### **PARACLETE AVIATION LIFE SUPPORT**

Launched in 2014, Paraclete Aviation Life Support designs helmets with innovative technology and modern composites that drive safety and comfort. Headquartered in Clarksville, TN, Paraclete provides worldwide service to clients in 30 different countries, including Europe, South America and Asia. Expanding the company's commitment to high-quality aviation safety standards, Paraclete is the only helmet manufacturer in which all helmets, in every size, are certified to the DOI-USFS Aviation Helmets Standard; Paraclete is also an ISO 9001:2015 certified manufacturer that provides Aviation Life Support Equipment [ALSE] education and training services. As a committed member of Helicopter Association International [HAI], Association of Air Medical Services [AAMS], Airborne Public Safety Association [APSA], and the National Business Aviation Association [NBAA], Paraclete continually provides associations with data and critical research in the spirit of a safer rotor industry for all. Paraclete's product development is directed by research and innovation solutions as the only independent Cooperative Research and Development Agreement [CRADA] with the United States Army Aeromedical Reserach Laboratory [USAARL].
