

Discover the New Enstrom at HAI HELI-EXPO 2023

Atlanta, GA. Enstrom Helicopter Corporation invites all rotorcraft enthusiasts to discover the new and improved Enstrom at this year's HAI HELI-EXPO in Atlanta. The annual event features networking opportunities and hundreds of education courses with more than 14,000 industry professionals.

A lot has changed for Enstrom since last year's HELI-EXPO. New, visionary ownership has brought about company-wide revitalization. We are ramping up production and reenergizing our current product line with new features we can't wait to tell you about.

"Enstrom is back and buzzing with activity," said Incoming President Todd Tetzlaff. "We are looking forward to sharing the latest on our progress and where we are headed with our customers and anyone else who is curious about the new Enstrom."

Todd will be on the show floor this week alongside our new Chief Operating Officer Adam Richardson and new owner Chuck Surack. We invite all HELI-EXPO guests to come and connect with Enstrom's new leadership team in booth C2820. Todd, Adam, and Chuck each share a contagious passion for helicopters, a passion that will prove instrumental in crafting Enstrom's next chapter.

Two of Enstrom's latest helicopter models will also be on display at our booth.

We're preparing to make several major announcements before the HELI-EXPO concludes Thursday. We encourage anyone unable to make it to the show in person to sign up for our newsletter at enstromhelicopter.com.

About Enstrom Helicopter Corporation

From Rudy Enstrom's early designs in 1943 to initial testing in a Michigan Quarry in 1957 to aircraft operating on six continents, Enstrom Helicopter Corporation has maintained a reputation for safety, value and performance. Based in Menominee, Michigan and proudly made in the United States, Enstrom has a rich history for design innovation. The goal is to provide helicopters to the customer's exact specification and deliver support and maintenance worldwide.
