

Heli-One Contracted By Kolporter for CAMO Services

March 9, 2023 - Heli-One, a leading provider of helicopter maintenance, repair, and overhaul (MRO) services, has been contracted to provide Continuing Airworthiness Management Organization (CAMO) services for Kolporter, a European operator with a B407 aircraft. The services provided include a dedicated team, technical log management and a tailored maintenance program with a digital customer portal. Kolporter will benefit from Heli-One's expertise in full cycle maintenance and personnel to optimize long term maintenance planning to extract full value of the aircraft.

Kolporter, who has been operating aircraft for 20 years, required a CAMO provider that would be understanding and flexible to their unique needs, on top of being fully certified, with a proven track record of aircraft maintenance and planning. Heli-One provided a tailored solution including a user-friendly Aircraft Technical Log leveraging Heli-One's state-of-the-art maintenance management software system with remote digital access for Kolporter.

Heli-One utilized decades of flight and maintenance planning data to develop a customer-centric solution with budget predictability and flexibility in mind. This allows Kolporter to better forecast budget spending to align with operational needs. They also benefit from Heli-One's world-class safety management infrastructure to ensure a consistent and excellent quality standard.

"We are pleased to support Kolporter with their CAMO needs. Our Heli-One Poland team delivers exceptional customer service and this customer's aircraft is in safe and capable hands. We are looking forward to helping them maximize the full value of their aircraft, without sacrificing safety, on a reasonable budget," said Carolyn Forsyth, General Manager of Sales, Commercial & Customer Support.

Heli-One Poland is an EASA Part 145 Approved Maintenance Organization with a CAMO Organisation approval from the Poland Civil Aviation Authority, Civil Aviation Authority of the United Kingdom and the Cayman Islands Civil Aviation Authority.

About Heli-One

Heli-One has MRO operations in Richmond, Canada; Delta, Canada; Stavanger, Norway; and Rzeszow, Poland. Heli-One is a leading independent helicopter MRO with certifications and expertise in a broad range of airframes and components from major helicopter and engine manufacturers, including Leonardo, Airbus, Sikorsky, Bell, Safran Helicopter Engines, Pratt & Whitney Canada and General Electric.

Heli-One is a segment of CHC Helicopter, the operating company of CHC Group Ltd. For more information about Heli-One, visit: <https://www.heli-one.com>

Cautionary Note on Forward-Looking Statements

This press release and other statements that we may make contain forward-looking statements. Forward-looking statements are statements that are not historical facts and include statements about our future financial condition and future business plans and expectations. Such forward-looking statements are based upon the current beliefs and expectations of our management, but are subject to risks and uncertainties, which could cause actual results and/or the timing of events to differ materially from those set forth in the forward-looking statements. The forward-looking statements speak only as of the date on which they are made and the Company undertakes no obligation to publicly update such forward-looking statements to reflect subsequent events or circumstances. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those indicated.
