Nighthawk Flight Systems selected for Romanian PUMA L SAR Avionics Upgrade

Nighthawk Flight Systems, Inc. is pleased to announce the sale of SA4550 Primary Attitude Displays and SN3500 Primary Navigation displays to IAR SA supporting the Puma L, SAR avionics upgrade program in Romania. We are honored to be selected by IAR SA for this important multi-year upgrade program. The SA4550 has an LED backlit display with pilot configurable single or dual-cue flight director command bars and a glideslope/localizer deviation scale. The SA4450 accepts input from existing sensors to provide clear, reliable depiction of the aircraft's attitude in pitch and roll. The patented bright, high-contrast display provides unmatched readability in any lighting. The SN3500 compact, reliable, Primary Navigation Display has the same LED backlit display technology as the SA4550 and is loaded with advanced navigation capability and safety functions. It incorporates the equivalent of a four-inch screen in a three-inch instrument. The SN3500 is available with night vision and TACAN options as well.

Nighthawk Flight Systems, Inc. located in Vista, California is the exclusive US based, manufacturer and technical services provider for the full product range of Nighthawk Flight Systems Displays.
