## **VI&E Solutions Partners with Crisalion Mobility**

*VI&E Solutions and Crisalion Mobility partner to develop and analyze mobility projects*

**Neenah, WI – May 21, 2024**—Volatus Infrastructure & Energy Solutions has partnered with Spanish electric vertical and take-off (eVTOL) manufacturer, Crisalion Mobility to jointly develop and analyze advanced air mobility (AAM) projects including cargo, emergency medical services (EMS), urban air mobility (UAM), regional air mobility (RAM) and tourism. The teams will study the required aspects needed for successful and efficient operations of Crisalion Mobility’s Integrity eVTOL at VI&E Solutions’ vertiports to further enhance the efficiency and safety of AAM operations.

“We are excited to work with Crisalion so that we can analyze and study the interfaces between their Integrity eVTOL and our vertiport systems as well as develop strategies to minimize environmental impact and surpass sustainability standards to further reduce our environmental footprint,” said Grant Fisk, VI&E Solutions CEO.

“We are very proud to start this alliance in the United States with a key partner in the world of vertiports and infrastructures that will accompany us in the implementation of our eVTOL solutions. The new mobility represents an ecosystem in which many players will be involved, and it is a privilege for us to work with Volatus,” said Oscar Lara, Crisalion Mobility, Chief Operating Officer.

Crisalion Mobility, a leading Spanish company in the design and development of advanced, efficient, safe and sustainable electric mobility solutions, both in the air and on land. Born in 2019, previously known as UMILES Next, it is a pioneering company in the double commitment to air and ground electric mobility with its own technologies, offering solutions aimed at national and international operators.

Before 2030 there will be electric aircraft operating on urban and regional routes. There are already experiences of autonomous land mobility, remotely controlled from a control center. Crisalion Mobility is dedicated to the development of competitive solutions in both areas. Supported by cutting-edge technology, Crisalion Mobility is committed to improving people’s quality of life and contributing to the preservation of the environment through air and land smart mobility solutions.

Founded in 2021, Volatus Infrastructure & Energy Solutions is connecting communities with best-in-class eVTOL infrastructure technology to ensure society is ready for the future. VI&E Solutions offers three modular vertiport designs and charging stations for electric vehicles across all mediums: air, land and sea. By tailoring to specific customer needs and incorporating the latest technologies, their work positively impacts clients and the communities they serve globally. Join the future with VI&E Solutions.
